

STAKEHOLDER ENGAGEMENT PLAN		
Project Name	Crab	
Name	About the Stakeholder	How to Engage the Stakeholder
[Name of the person or group]	[Background and characteristics of the stakeholder]	<p>[Include one of the following:</p> <p>Pay close attention:</p> <p>Meet requirements:</p> <p>Provide information:</p> <p>Monitor:</p> <p>In addition, provide details of the approach to be taken to effectively engage with the stakeholder.]</p>
Chirayu Patel	Developer and team member. Will work with a team on project deliverables and coding for the front-end and back end. High power, high interest and supportive.	The developer will have meetings with the project manager every week and in the team, meetings will act as a medium to know about the project work distribution. Project manager will have meetings with developers to decide how to work on next steps every week. The team as a whole will also have scrums with the sponsor to let the sponsor know about the progress on the project. Will consult fellow developers about the AI, deliverables and coding developments made.
Eric Chartier	Developer and team member. Will work with a team on project deliverables and coding for the server, front end and back end. High power, high interest and supportive.	The developer will have meetings with the project manager every week and in the team, meetings will act as a medium to know about the project work distribution. Project manager will have meetings with developers to decide how to work on next steps every week. The team as a whole will also have scrums with the sponsor to let the sponsor know about the progress on the project. Will consult fellow developers about the AI, deliverables and coding developments made.
Kyle Jacob Labatete	Developer and team member. Will work with a team on project	The developer will have meetings with the project manager every week and in
